Golden, CO 80403

Dear Scott & Bob:

You will be happy to learn that the State of Kentucky has issued us a "No Further Action" letter in regard to the hydrocarbon plume that "previously" existed on our property.

Putting this environmental issue behind us is a wonderful thing. Trap & Treat® BOS 200® proved to be the remarkable in situ remediation product that you and the good folks from Shield Environmental said it was. The results, even when the regulators added some post-treatment wells, were nothing short of remarkable.

I would highly recommend Trap & Treat® products to other property owners who are facing similar environmental issues. BOS 200® works!

Thank you,
