

Dear -----,

Over the past ten years REGENESIS has deployed considerable resources in the development of colloidal activated carbon technology for use in the restoration of contaminated groundwater and soil. These efforts have resulted in a portfolio of key patents issued and pending in the US and Europe. The right to use these patents is a benefit that comes with the purchase of REGENESIS' products PlumeStop® and PetroFix®, which have now been used to restore hundreds of project sites around the world.

**Use of any other colloidal activated carbon product for the *in situ* restoration of groundwater or soil would likely result in the infringement of one or more claims of these patents and, as a consequence, be subject to legal action by REGENESIS to seek injunctive relief, damages, and attorney's fees. This may include legal action against those that directly infringe (e.g. remediation contractors), those that induce infringement (e.g. consulting engineering firms), those committing contributory infringement (e.g. product suppliers), or those that benefit from such infringement (e.g. site owners).**

REGENESIS' patents claiming the use of Colloidal Activated Carbon for *in situ* remediation include but are not limited to:

- Patent controlling the injection of colloidal activated carbon particles into subsurface media under low pressure:
  - US Patent #7,585,132
- Patents covering the use of colloidal activated carbon to treat heterogeneous media to stop matrix back-diffusion:
  - US Patent # 9,776,898
  - US Patent # 10,005,684
  - Europe Patent # 3,105,190
- Patent controlling the engineering of the subsurface hydrophobicity in order to sorb contaminants from aquifer waters:
  - US Patent # 10,4768,876
  - Europe Patent # 17813929 (pending)
- Patent covering chemistries to suspend and disperse colloidal activated carbon particles for optimum distribution within subsurface media:
  - US Patent #9,770,743
  - Europe Patent # 3,027,562

REGENESIS is bringing these patents to your attention so that you are made aware of the rights REGENESIS has in this area. We therefore trust that your company can and will take all necessary action to avoid infringing those rights.

If you have any questions regarding this matter, please contact me directly at our corporate office: (949) 366-8000.

Sincerely,

**Scott Wilson**  
President & CEO  
949-218-0686
